Q3: Count $\leftarrow$ 0
 Declare num, count $\leftarrow$ INT
 Output "Enter a number:"
 Input num
 While (num DIV 10) $\neq$ 0 Do
 num $\leftarrow$ num DIV 10
 count $\leftarrow$ count + 1
 End while
 Output ("It is a", count, "Digit no.")

1. Declare count and num as integer.
2. Initialise count by 0 and take input for num.
3. Use a pre-conditioned loop until the integer value of number divide by 10 is not 0.

Q4: Declare table $\leftarrow$ INT
 table $\leftarrow$ 0, count $\leftarrow$ 1, ~~result~~ $\leftarrow$ 0
 while table $\neq$ 0 Do

4. keep incrementing count and when loop terminates, output it.
