

Q2: Declare year:INT
Output "Enter year:"
Input year

If year MOD 400 == 0 then
Output "It is a leap year"
ElseIf year MOD 4 = 0 then
If year MOD 100 == 0 then leap year.

Output "It is not a leap year"
Else
Output "It is a leap year"
EndIf

Else
Output "It is not a leap year"
EndIf
EndIf

1. Declare year as integer
and take input for it from
user.

2. Check if the remainder
when year divided by 400
is 0. If so, output it is a

3. Check if the remainder
when year is divided by
4 is 0. If so, check
if when year is divided
by 100 the remainder is 0.

5. If it is 0 then output
it is not a leap else
output it is a leap year.
